

VITACEL[®] Raw Fibre Concentrate for Calves

HEALTHY – ECONOMICAL - NATURAL

What is VITACEL[®]?

VITACEL[®] is a **mycotoxin-free** raw fibre concentrate consisting of insoluble raw fibres which increase the digestibility of nutrients leading to more economical animal production.

What are the main benefits of VITACEL[®]?

Reduced Diarrhoea Incidence The early addition of VITACEL into the young calves diet assures a gentle transition from milk to crude fibre, substantially reducing digestive disorders. In calves already suffering from diarrhoea VITACEL[®] improves the consistency of the faeces by thickening the digesta and supporting the intestinal peristalsis. Together with the bound water, toxins and bacteria are eliminated from the calf's body and the balance of the large intestine is stabilized.

Earlier intake of roughage during rearing period leading to higher weight gain

VITACEL[®] accelerates rumen development by stimulating and increasing the size and number of the ruminal villi, thereby increasing intestinal activity and absorption of essential proteins, vitamins and minerals required for growth. The impacts of early rumen development are:

- ✓ The increased weight of the calf at weaning
- ✓ The younger age of the calf at weaning
- ✓ The higher feed conversion at weaning

How is VITACEL[®] used?

VITACEL[®] is suitable for all feeding strategies. VITACEL[®] is recommended to be added at a rate of 10g per litre for at least the first 2 weeks of the calf's life, when the calf is more prone to digestive problems.

Please note that this preparation is suitable for use without veterinary advice only in the treatment of minor cases or diarrhoea. The preparation will not treat dehydration. If the preparation fails to alleviate the condition being treated the user should seek veterinary advice.

This product is exempt as a non-medicated anti-diarrhoeal preparation and oral nutritional compound under the ACVM Regulations 2001 and Amendments and subject to conditions in Schedule 2 and 4.

Where can I get VITACEL[®]?

Miro Feeds Limited are the exclusive supplier of VITACEL[®] in New Zealand.
